

THE POND BOOK

A guide to the management and creation of ponds

This book brings together the latest research on ponds, takes a fresh look at a wide range of management issues and offers practical guidance on the ecological and archaeological value of ponds. It explains why applying generalised rules to every pond may actually reduce their wildlife value and gives you the latest thinking and information to help you decide what is the best solution for your particular pond. Primarily about creating and managing ponds in the countryside, it is also a valuable resource for thoughtful gardeners keen to contribute to wildlife conservation on a domestic scale.

Cost = £17.00 within the UK or £22.00 outside the UK (includes postage and packing).

Cheques – in sterling only please – payable to Freshwater Habitats Trust.
